

1500°F / 815°C: Exhaust Hose

- Designed for extracting fumes from metal fabrication works, refining, smelting, forging.
- Makes a great large air gap heat shield to cover piping, wires and cables.
- Constructed of a 3 ply non-flammable, lightweight and flexible ceramic coated hose, with a V4A internal stainless steel wire.
- Has an external steel wearstrip for abrasion resistance.
- Only sold in full coil lengths of 25 feet.

High Temperature Exhaust Hose / Ducting
