1200°F / 648°C: Very High Temperature

- Graphite Coating / Impregnation

Graphite adds lubrication to result in a very slippery rope but does not add electrical conductivity.

Resists molten splash and splatter very well as it cannot stick to the graphite.

Service temperatures up to 1200°F / 648°C.

Used as a compression packing for pump and valve shafts.

Graphite coating / impregnation process results in an approximate 1/4 depth penetration into the fiberglass.
