AB-SRET-M038-24	1 1/2	38	\$ 47.00

Standard length is 36 feet, rolled

End Wrap Tape is a unique adhesive-free tape which self-fuses/self-bonds when wrapped over itself, providing an excellent water-tight and air-tight seal. Typically used to protect the free ends of sleeve from wicking liquids once installed on hoses or cables. Also provides a method of making a clean and neat installation. This tape has a triangular profile, and when over-wrapped at 50% has a minimal ridge line. The tape may contain a marking stripe along its center to help in lining the tape up at 50% of its width while over-wrapping.

This Product is NOT Available By The Foot – Full Rolls Only
